

## WELCOME TO BINDIMAPS

BindiMaps is an accessible, free, wayfinding app that uses intuitive audio, map and text directions to guide people in indoor spaces. It uses simple, natural language voice navigation to describe where the person is, what's around them, and the best way to get to their chosen destination

It is optimised for people with a disability – particularly people with a vision impairment and wheelchair users who can navigate via wheelchair friendly routes.

### AUDIO + MAP DIRECTIONS

Choose any destination and BindiMaps will guide you there with intuitive audio directions, or you can use map view and text directions.

### SHARE YOUR LOCATION

Use our Share This Location feature to send a location to a friend so BindiMaps will guide them to you.

MAPS

### HAZARD ALERTS

We tell you about stairs, obstacles or other structures that may make it more challenging to navigate.

### EMERGENCY EVACUATIONS

In emergencies, BindiMaps guides you to the nearest emergency exit, then on to the designated emergency evacuation point.

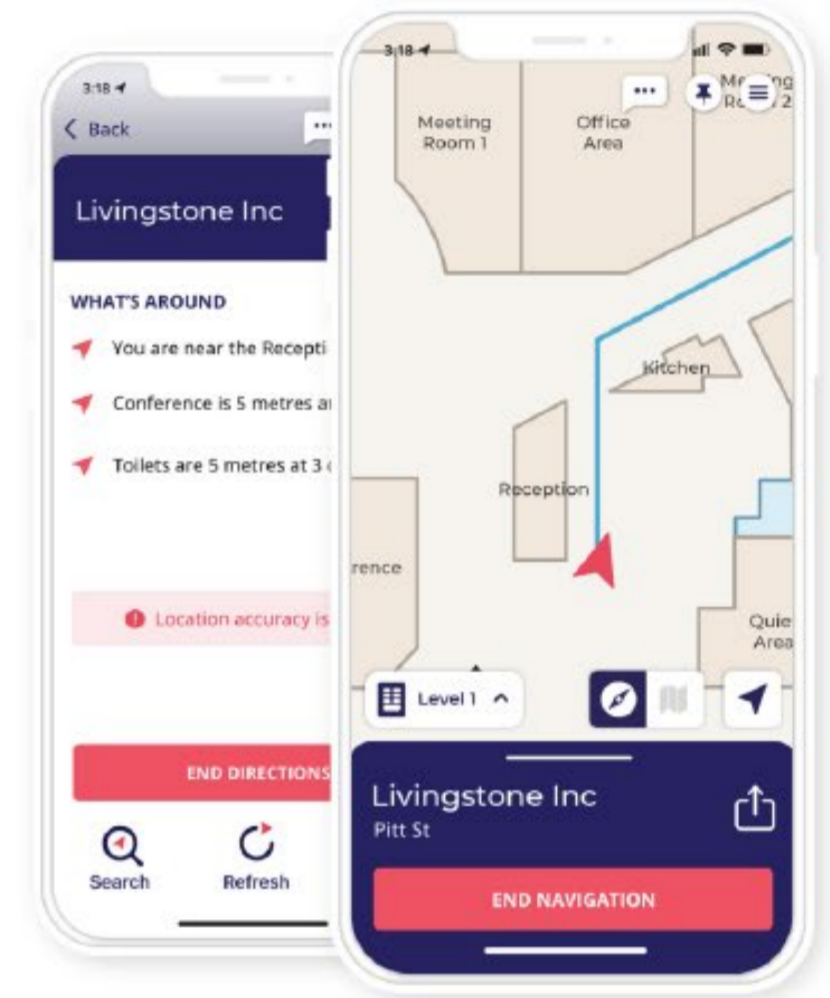

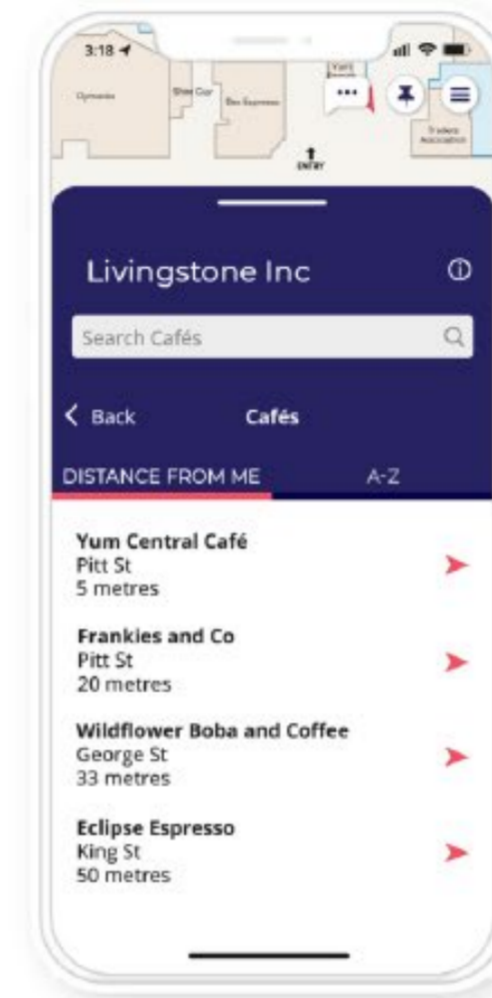

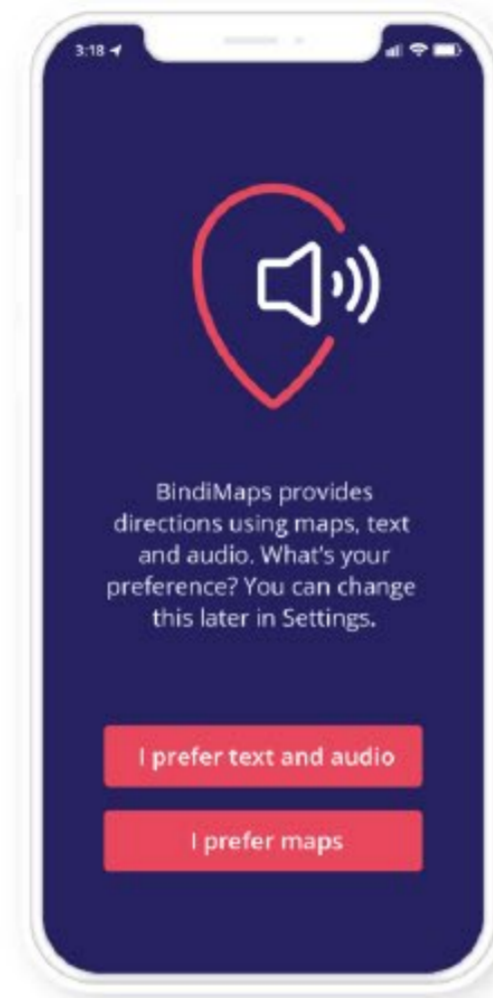

### DROP A PIN

Drop a pin and save your favourite locations like meeting rooms, stores, entrances, and where you parked your car!

# HOW BINDIMAPS WORKS

Download BindiMaps free indoor navigation app and use any time after 1 June 2023.

Open the BindiMaps app. Our technology will find you. Then choose maps, voice or text to guide you around the Courts building quickly and easily.

Choose your preference

Select your destination
